

# REALITY TO ABSTRACT PROJECT

## DRAWING (100 Points)

In 5 steps you are going to change a realistic drawing into an abstract drawing. The final drawing will later be transferred/copied and become your final painting.

1. Find a photo image to draw your subject from (fruit, animals, shoes, toys, insects, flowers, person...these things work best). Find something with good value, texture, line...
2. Using the 5 Step Handout (on back) complete a series of 5 drawings of your subject.

## FINAL DRAWING (100 Points)

Your final drawing is a grid enlargement of either your #4 or #5 drawing. You must use:

- Blending/shading techniques (light to dark or 1 color to another)
- Stippling (small repeated dots)
- Variety of colors and contrasting values

\*\*Have fun and be creative with your drawing technique and colors. Colors do not have to come from the original subject matter.
